Period fo	The MAILING DATE of this communication app or Reply	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3746

DETAILED ACTION

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: drive shaft 246. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. 35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: there are numerous misspellings and omissions throughout the specification. For example, on page 1 alone of the specification, "tak n", "eith r", "p riphery" "issu d" are all misspellings.

Application/Control Number: 10/724,499 Page 3

Art Unit: 3746

3. Furthermore, applicant repeatedly references the drawings with "1 #" and "2 #." However, the use of the element numbers 1 and 2 are not in the Figures. These should be deleted throughout the specification. For example, on the top of page 8 "1 118" should be replaced by -118--.

Claim Rejections - 35 USC § 112

- 4. Claims 1-70 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.
 - The disclosed piston arms 148, 154 are not enabled to operate the air pistons 172,
 178 with the limited disclosure therewith. How can the arms attach to the
 reciprocating piston 138 and reciprocate the air pistons?
 - The disclosed air piston system with air outline passages and air inline passages is
 not enabled to operate a flywheel. The air outline passages drive the flywheel;
 however, the suction of the air back within the air inline passages will pull the
 flywheel in the opposite direction of the air from the air outline passages.
 Consequently, the flywheel will be pushed back and forward rather than freely
 rotate.
 - Applicant discloses an expansion means for the exhaust from the combustion chamber 118. However, there are no expansion means identified or illustrated.

Application/Control Number: 10/724,499 Page 4

Art Unit: 3746

Claim Objections

5. Claims 2-70 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s). Applicant is claiming limitations in these dependent claims which are already claimed in claim 1. These dependent claims should be deleted.

Claim Rejections - 35 USC § 102

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1-70, as best understood, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ohori (5,669,340) who teaches a flywheel 11, 12 with cylinders 18.
- 7. Claims 1-70, as best understood, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rinker (3,710,569) who teaches a flywheel 13 with cylinders 42a, 42b.
- 8. Claims 1-70, as best understood, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wilcoxson (2,350,005) who teaches a flywheel 8 with cylinders 10, 15.

Applicant Query

9. PTO records indicate a Terminal disclaimer was filed by applicant on 10/12/2004. However, there is no terminal disclaimer available in the file. Applicant is requested to verify whether there was indeed a Terminal disclaimer filed.

Contact Information

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Ted Kim whose telephone number is 571-272-4829. The Examiner can be reached on regular business hours before 5:00 pm, Monday to Thursday and every other Friday.

The fax numbers for the organization where this application is assigned are 703-872-9306 for Regular faxes and 703-872-9306 for After Final faxes.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler, can be reached on 571-272-4834.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist of Technology Center 3700, whose telephone number is 703-308-0861. General inquiries can also be directed to the Patents Assistance Center whose telephone number is 800-786-9199. Furthermore, a variety of online resources are available at http://www.uspto.gov/main/patents.htm
